

WATER FLOW CONTROL EQUIPMENT

Water Flow Control Equipment are designed to serve to a wide variety of duties. Selection of the correct equipment to suit the duty is important to overcome the design criteria and provide the most cost effective solution.

The range of available operating equipment is extensive; from simple direct operation by hand-wheel to complex control systems by electrical actuation. The range of water flow control equipment with associated operating equipment will outfit the most demanding specifications and applications.

The main Water Flow Control Equipment in Astim design and manufacturing scope are;

- Penstocks,
- Stoplogs,
- Adjustable Over Flow Weirs,
- Telescopic Valves,
- Adjustable Inlet Baffles,

Motorized Adjustable Overflow Weir

Penstocks closing the channels

Astım Water Flow Control Equipment can be designed and manufactured as manually operated or electrically actuated. All parts are manufactured in epoxy coated or hot dip galvanized carbon steel or stainless steel according to requirements or process conditions.

Stoplogs with multi-obturators

Comfortable manual operation with gearboxes

Weir type Penstocks with electrical actuators

ASTİM Endüstri Tesisleri İmalat Montaj ve Taahhüt A.Ş.
